Course Description

This course provides an opportunity for student-teachers to explore key issues in teaching and learning English. It has three main goals. **The first goal** is for our classroom community to develop a shared terminology (i.e., vocabulary) for talking about teaching. Participants will gain familiarity with prominent educational approaches such as Cooperative and Collaborative Learning, Content and Language Integrated Learning (CLIL), Active Learning and Task- and Project-based Learning as well as key concepts such as Learner Autonomy. **The second goal** is to promote reflective teaching practices. Through online assignments and class discussions, participants will have opportunities to relate the course content to their own teaching experiences. **The third goal** of the course is to develop a foundation for further learning in the MA Program. The main course assignment called *Teaching Issues Paper* provides student-teachers with an opportunity to identify issues arising from their reflections that they wish to explore further in the program. Others important areas of focus in the course that will be of use throughout the program are presentations, library research skills, especially referencing and citation practices, educational technology, and most importantly, the formation of a supportive professional learning community.
