Course Description

This course provides an opportunity for student-teachers to explore key issues in teaching and learning English. It has three main purposes. **The first** is for our classroom community to develop a shared terminology (i.e., vocabulary) for talking about teaching. Participants will gain familiarity with well-known educational approaches such as Cooperative and Collaborative Learning, Content and Language Integrated Learning (CLIL), Active Learning, and Task-based Learning as well as key concepts such as Learner Autonomy. **The second** is to promote reflective teaching practices. Through online assignments and class discussions, participants will have opportunities to relate the course content to their own teaching experiences. **The third purpose** of the course is to develop a foundation for further learning in the MA Program. The main course assignment called *Teaching Issues Paper* provides student-teachers with an opportunity to identify issues arising from their reflections that they wish to explore further in the program. Other important areas of focus in the course that will be of use throughout the program are presentations, library research skills, especially referencing and citation practices, educational technology, and most importantly, the formation of a supportive professional learning community.

Key Course Outcomes

Upon successful completion of this course, participants will:

1. Compose a *Teaching Issues Paper* that includes a detailed description of a real/envisioned teaching context, a reflective discussion of its pedagogical issues, and an account of relevant literature for further exploring the issues (**DP 4,10**).
2. Create a video presentation on a TESOL-related topic of the student's choice that summarizes information on the topic, illustrates key points with concrete examples, and discusses specific implications for teaching practice (**DP 2,4, 7, 10**)
3. Apply TESOL principles in class discussions to analyze, evaluate, and adapt teaching practices (**DP 2,4,10**)
4. Complete collaborative tasks to enhance the learning of all class members and nurture a positive and supportive learning environment (**DP 4,7,10**)
5. Demonstrate facility with educational technology, library research, academic style conventions, and other related areas needed for success in the MA Program (**DP 10**)

Note. DP is an abbreviation of Diploma Policy statements. TESOL Program statements (objectives) can be found [here](#). Numbers correspond to the statement(s) emphasized in each course outcome.
